As a healthcare worker, you are considered critical to the ongoing health and well-being of our community. The safety of our healthcare teams is a priority to North Florida Regional Medical Center (NFRMC) and, as such, we are inviting you to receive a COVID-19 vaccine. This invitation extends to the healthcare workers in your practice. Please share accordingly.

We are continuing to follow Centers for Disease Control and Prevention guidance and the Governor's Executive order **in only providing the vaccine to healthcare workers at this time**. We are not able to vaccinate spouses, family members, friends, etc. who fall outside of this mandate nor are we providing the vaccine to the general community **at this time**, regardless of age or health status.

Vaccinations will be provided based on available supplies and on a first come, first serve basis only. Please note that receiving a vaccine at NFRMC, you are committing to returning within the required time frame for your second dose, which we will reserve for you. Also, please remember that the **vaccines are not interchangeable**, so you must receive the second dose of the same vaccine as the first dose. The vaccination process will require time for documentation as well as a mandatory 15-30 minute observation period; this does not include wait times.

NFRMC has a vaccine clinic at our main hospital located at 6500 W Newberry Road, Gainesville, Florida. Enter through the main entrance and you will be directed to the vaccine clinic location. Parking is available in the P1 Parking Garage.

Clinic walk-in hours are currently as follows:
